

CASA BIUI

PRISM

GENERAL INFORMATION

CASA BLUI – PRISM

Capacity: 4 people

Seating positions: 4 positions

Dimensions: 79" x 81" x 92"

Prism is the sauna that becomes the heart of your wellness routine. With its bold glass façade and crisp white frame, it stands out as a design statement while blending seamlessly into contemporary homes. Inside, rich wood and ambient integrated lighting create a warm, immersive environment that feels both energizing and soothing.

Prism offers generous tiered seating so couples, friends, or family can share the experience in comfort. The stylishly enclosed heater ensures a powerful, even heat that invites longer, deeper sessions. Whether installed indoors as a wellness hub or outdoors by the pool, Prism strikes the perfect balance between size, presence, and performance—elevating both your space and your daily rituals.

KEY FEATURES & BENEFITS

All-Weather, Wind-Rated Enclosure

Aluminum frame, safety glass, compression gaskets, and a rotating-lock door create a tight, rain-proof shell built for outdoor exposure and high winds.

Engineered Heat & Airflow

Stone heater integration with under-stove intake and roof vent delivers fast heat-up, stable löyly, and steady fresh-air exchange.

Hygienic, Hard-Wear Surfaces

Sintered-stone floor and daybed plus sealed joints resist moisture, stains, and abrasion—cleaning is quick and long-term durability is high.

Safety & Compliance Ready

Laminated/tempered glass options, high-temp gaskets, low-VOC MS-polymer sealants, GFCI-ready wiring, and over-temperature protection support certification and safe operation.

Smart Control & Easy Service

Control-panel integration, clear cable routing, and accessible service panels simplify installation, diagnostics, and field part replacement.

Flexible Delivery & Rapid Install

Available pre-built or knock-down (KD) with labeled components and protected packaging to fit tight sites, lower freight risk, and shorten time to first use.

INSTALLATION REQUIREMENTS

Delivery access & clearance

Ensure there's a clear path from the street/front door to the final spa location with at least ~15" extra clearance, and confirm if any special equipment (e.g., crane/forklift) is needed. This prevents last-minute logistics failures and damage during handling.

Structural foundation

The site must be level, structurally sound, and preferably a reinforced concrete pad $\geq 4"$ thick (with rebar/wire mesh), proper slope for runoff ($\leq \frac{1}{2}"$ over 8 ft), and free of hollows/bumps. It must be able to sustain 6000 lbs. This protects the shell and plumbing from torsion and uneven loading over time.

Service clearances

Maintain ~20" around all four sides; for built-ins, include removable panels for full service access. Adequate working room is essential for future maintenance, leak checks, and component replacement without demolition.

Electrical supply & protection

Provide a dedicated 220–240 V, 60 Hz single-phase circuit with a 50–60 A breaker per spec, copper conductors of the correct gauge, and clear access to the main breaker or GFCI disconnect. Proper power sizing and protection are critical for heater/pump performance and user safety.

Ventilation

Maintain 2 in clearance under the sauna for airflow. Keep base area unobstructed to avoid moisture accumulation.

CONTACT & SUPPORT

Luis Acosta - Operations & Logistics department Head

 (305) 701-4085
